

HOW TO TEACH PHONICS *FASTER*

workshop by Renée Ellison

Are you overwhelmed teaching phonics—or at the thought of doing so? Do you feel like it takes a professional educator to even understand phonics, let alone teach it to your child? Now you can be a normal, common person, but teach phonics like an expert.

1. Why we in the US sit 24th in the world in reading test scores

2. What's wrong with our current methodologies?

3. A child's perspective on the job of decoding

4. How to employ some powerful learning hooks to initially get a child up and on the "reading bus" faster than we have ever done it before

Order Renée's book, *Fast Phonics* (item #116 on our order form), and you'll have all you need to start teaching a child how to read by the phonics method.

Note: our booth sales end before dark on Friday, but we are available at our booth on Saturday to meet you and talk.
